

HOME FOR SALE/DRUGS FOR FREE:

3 BR, 2 BTH, 2 Medicine Cabinets, 3 Bedroom Stands, and 6 Kitchen Cupboards filled with prescription and over-the-counter drugs free for the taking. Must see to believe!

Empty nest? Too full nest? Relocation?

Whatever the reason, you've decided to sell your home. You've polished the woodwork, repainted the rooms, reseeded the lawn. It's time for the Open House...but wait! Your house isn't the only thing that's open—what about your medicine cabinet?

Theft of prescription medication from medicine cabinets, bedside stands, and cupboards during open houses is a growing problem in our community.

Every day **2,500 youths ages 12-17 abuse a pain reliever for the first time**. Prescription drugs are the drug of choice for 12 and 13 year olds.

The reason: teens say prescription drugs are easy to get from medicine cabinets and they wrongly believe that prescription and over-the-counter drugs are "safer" than illegal drugs.

Open your house...not your medicine cabinet.
